OVERVIEW OF PLANNING PROCESS

In developing our plan, a number of key factors were discussed. The BOCES serves not only internal staff but also the external staff of our component districts. However, whenever there are common areas for both BOCES and the component districts, collaboration will be advantageous.

Internally, the BOCES staff presents a multi-faceted organization. We serve Pre-K children through adults. Our curriculum is directly aligned with the New York State Standards but also extends into Career and Vocational areas. Our process must be one that allows for all departments to customize theirneeds while working within a common framework.

IV. Description of the Plan

All professional development is aligned with New York standards and assessments and meets the NYS Professional Development Standards. Future professional development will emphasize improved student outcomes with an emphasis on literacy and math. Common Core Learning Standards are being infused into all appropriate curriculum areas and more students will become involved and successful on the new state assessments.

Professional development opportunities currently existing are:

- Grade level and department planning time
- Faculty meetings
- Staff Development Days
- Technology/Standards support
- Mentoring program
- Teacher Center or BOCES workshops/trainings
- Peer collaboration and visitation
- Summer curriculum development
- Speakers/consultants invited to present or work with teachers on research based practices (e.g., vocabulary instruction, differentiated instruction, artists in residence)

The Professional Development Planning Team researched effective practices in professional development and meets to articulate and plan for professional development across grade levels.

Key ideas of effective professional development include:

- Ongoing, sustained professional development
- Adequately funded professional development
- Mentoring new teachers
- Data driven needs identified by student assessments
- Follow through provided on initiatives
- Focus in targeted areas
- Evaluate effectiveness
- Meeting identified needs
- Multi levels of training (awareness, in-depth, support of new skills)
- Integration of professional development into classroom practice
- Application to student /teacher needs
- Time allotment to be successful in professional development initiatives
- Enabling teachers to collaborate
- Based on current information, research, and data
- Result driven staff development will be driven by student results

The plan will incorporate as many of these practices as possible to ensure that professional development is continuous and sustained. Our professional development plan addresses the needs of staff at all stages of their careers and is applicable to professional and supplemental school staff in general education and special education. A sustained effort in these goal areas

reflects a continuous systemic approach to improve student performance. As the result of

August 17, 2021

focused involvement in professional development, instructional staff will better meet the needs of the students they teach. Many staff are involved in curriculum review and alignment of tasks to assure access to general education curriculum for all students

Data from ELL enrollment, assessments and identified needs will drive professional development specific to the needs of ELLs, co-teaching strategies, and integrating language and content instruction: 15% total hours ELL-specific Professional Development for all teachers and 50% total hours ELL-specific Professional Development for ENL/ESL teachers.

The BOCES will utilize the expertise and trainings provided by the Regional Bilingual Education- Resource Network to fulfill these requirements.

The district will measure the impact of professional development on student achievement on all New York State tests. Increasing the number of students meeting proficiency in ELA and Math will indicate that classroom instruction is effective and meeting the needs of our students. Principal observations and evaluations (formal evaluations and informal "walk-throughs") will identify the use of effective classroom practices.

V. Evaluation

A variety of needs assessments will be used to monitor the quality and effectiveness of each goal of the professional staff development program. From these assessments, gap analyses will determine adjustments relative to the overall and specific aspects of the staff development program. Professional development around the evaluation of professional development is intended to build the capacity of BOCES staff and participating districts by helping them gain introductory knowledge in evaluation and practitioner-friendly tools and templates. District teams will learn about connecting program objectives with measurable outcomes, monitoring implementation fidelity, gathering and analyzing preliminary data, and utilizing data for program improvement. The objectives of the proposed training series are:

- To provide a basic overview of planning for evaluations of professional development.
- To enhance participants' knowledge of why it is important to assess the fidelity of professional development program implementation.
- To support participants' use of high-quality data related to their professional development initiatives.

A spring/summer annual review will be conducted by the Professional Development Planning Team to discuss the evaluation data and to discuss any changes that need to be made to this plan. The plan will be updated from that meeting will be sent to the Board of Education for review and approval.

The BOCES District Professional Development Plan is created by a committee for the purpose of improving the quality of teaching and learning both within the BOCES and its component districts. This plan ensures that teachers participate in substantial professional development to remain current and meet the learning needs of their students.
