

Instruction

SUBJECT: ANIMALS IN THE SCHOOL (INSTRUCTIONAL PURPOSES)

Observation and experimentation with living organisms and animals gives students unique perspectives of life processes. Animals and animal materials should be used respectfully and for the purpose of meeting course objectives.

The Board, in recognizing the educational uses of animals in the classroom, requires that permission be obtained from the building principal before animals are brought into the school or classrooms. It is the principal's responsibility to ensure that there is an appropriate educational purpose if any animal is housed in a classroom. Animals are not to be transported on school buses with the exception of service animals.

Study and Care of Live Animals

It will be the responsibility of the principal or designee to develop a plan of care for those animals housed in school in the event of an emergency school closing or in the event the animals remain in the classroom on days when school is not in session.

Dissection of Animals

Any student expressing a moral or religious objection to the performance or witnessing of the dissection of an animal, either wholly or in part, will be provided the opportunity to undertake and complete an alternative project approved by the student's teacher; . An alternate activity clearly related to and of comparable rigor will be assigned in lieu of laboratory dissection. Some examples of alternate activities include the use of computer simulations or research. Students who perform alternative projects will not be penalized.

The BOCES will give reasonable notice to all students enrolled in a course that includes the dissection of an animal about their rights to seek an alternate project to dissection. This notice will be made available upon request at the school and distributed to parents and students enrolled in a course that includes dissection at least once at the beginning of the school year.
